

ELECTRONIC PROOF OF DELIVERY

Save time – All job details from TMS will transfer to the ePOD app on a mobile device. With a few easy steps, collect signatures, pictures and all required information to complete the work.

Save money – Receive delivery notes immediately and email copies to customers on the spot. Gaining instant access to delivery confirmations speed up the invoicing process ensuring you get paid faster, with fewer challenges or queries.

Save paper – No more scruffy pieces of paper or lost paperwork. Delivery notes are guaranteed to be fully completed and professional looking. Include your own logos and terms and conditions on all documentation.

Take control – Every job will show a full audit trail, every change, edit and assignment will be logged, including receipt of job, completion of job and sign off, telling you who completed each stage and when.

When & where – Know exactly where deliveries were completed and signatures captured with time and GPS location stamps for bulletproof delivery confirmation.

Unmanned site – Complete webPOD's when working with unmanned sites, proof of delivery can be completed remotely.

Customer access – Allow customers access to their own Proof of Delivery notes with a third party log in. Only their own job information and POD's will be accessible.
