

# ASSET MANAGEMENT

Too many whiteboards? Unmanageable folders of information? Store all your fleet maintenance details in one place with the TrackTrans asset management function.

Allocate vehicles and trailers to groups, depots with full descriptions. Create service and maintenance schedules with pre-determined notifications. Set up reminders based on both dates and odometer readings.

Upcoming and late notifications can be pinned to the TMS home page to ensure you never miss an important service event.

The screenshot shows the TrackTrans web application interface. At the top, there is a navigation bar with menu items: Jobs, Loads, Trunks, Enquiry, Diary, Invoicing, Reports, PODs, Admin. The user is logged in as SAAdmin1098ts at Depot:RDG DPT. The main content area is divided into three sections:

- Assets:** A list of asset identifiers such as AK18LLX, A018VZJ, CE18VMU, etc.
- Detail:** A form for editing asset details. Fields include Number (5), Category (7.5 TONNE), Group (Vehicle), Location, Depot (READING DEPOT), Description (AK18LLX), Registration (AK18LLX), Make (DAF), Model (F45), Enabled (checked), Owned (checked), Epod, Mobile No, Base cost (0.00), Charge per kg (0.00), K+N File reference, and Regions.
- Groups:** A configuration panel for asset groups. Fields include Vehicle, Description (Fixed), and Vehicle. Below it, a **Categories** section shows details for the '7.5 TONNE' category, including Code (7.5T), Group (Vehicle), Planning Group (Dirty), Depreciation type (Fixed %), and Depreciation value (0.00).

**Expiry Overview**
