

PERSONNEL MANAGEMENT

Create and maintain full personnel records within the TrackTrans system.

Information can be stored to help effectively manage the workforce including start dates, working week details, driving licence details, holiday allowance and pay codes.

The holiday planner allows staff members to request holiday dates as well as other reasons for leave including doctors and dentist appointments, training, compassionate leave, maternity and any other customisable options a business requires.

All data is connected to ensure you can't schedule and plan a driver who is not available.
